

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A home medical examination system comprising:  
a user terminal for a client requesting a home medical examination to make a request for a medical examination of a disease,  
a medical center terminal for transmitting a medical examination chart created including instructions on a medical examination of a disease made in response to said request for a medical examination of a disease and on emergency measures based on the examination and instructions on a prescription for a medicine and on the use of medical equipment based on said medical examination of a disease to said user terminal and a facility for compounding said medicine, and  
a pharmacy terminal for giving instructions on delivery to the user of the medicine compounded at said compounding facility based on said medical examination chart and said medical equipment and sending the instruction result as delivery information to said user terminal and said medical center terminal;  
wherein said client requesting a home medical examination makes a request for a medical examination of a disease by accessing said medical center terminal through said user terminal and entering request information into a home medical examination request of a predetermined format prepared in said medical center terminal, said request information including current symptoms.

2. (Original) The home medical examination system according to claim 1, wherein  
said medical center terminal conducts interactive communication with said user terminal to receive image information and voice information of said client requesting a home medical examination from said user terminal in response to a request for a medical examination of a disease from said user terminal.

3. (Original) The home medical examination system according to claim 2, wherein

said user terminal includes a camera for receiving input of said image information and a microphone for receiving input of said voice information.

4. (Original) The home medical examination system according to claim 1, wherein

said user terminal, said medical center terminal and said pharmacy terminal are connected through a communication network including the Internet.

5. (Cancelled)

6. (Original) The home medical examination system according to claim 1, further comprising a health insurance society terminal for receiving said medical examination chart from said medical center terminal and said delivery information from said pharmacy terminal.

7. (Original) The home medical examination system according to claim 1, wherein

said user terminal, said medical center terminal, said pharmacy terminal and said health insurance society terminal are connected through a communication network including the Internet, and

said health insurance society terminal receives said medical examination chart from said medical center terminal and said delivery information from said pharmacy terminal through said communication network.

8. (Original) The home medical examination system according to claim 6, wherein

said health insurance society terminal calculates costs of a medical examination and medical treatment conducted in response to said request for a medical examination of a disease based on said medical examination chart and said delivery information.

9. (Currently Amended) A home medical examination method comprising the steps of:

making a request for a medical examination of a disease through a user terminal, transmitting a medical examination chart created including instructions on a medical examination of a disease made in response to said request for a medical examination of a disease and on emergency measures based on the examination and instructions on a prescription for a medicine and on the use of medical equipment based on said medical examination of a disease from a medical center terminal to said user terminal and a facility for compounding said medicine, and

giving instructions on delivery to the user of the medicine compounded at said compounding facility based on said medical examination chart and said medical equipment and sending the instruction result as delivery information from a pharmacy terminal to said user terminal and said medical center terminal;

wherein making a request for a medical examination of a disease comprises accessing said medical center terminal through said user terminal and entering request information into a home medical examination request of a predetermined format prepared in said medical center terminal, wherein said request information including current symptoms.

10. (Original) The home medical examination method according to claim 9, wherein

said medical center terminal conducts interactive communication with said user terminal to receive image information and voice information of said client requesting a home medical examination from said user terminal in response to a request for a medical examination of a disease from said user terminal.

11. (Original) The home medical examination method according to claim 9, wherein

said user terminal, said medical center terminal and said pharmacy terminal are connected through a communication network including the Internet.

12. (Cancelled)

13. (Original) The home medical examination method according to claim 9, wherein

a health insurance society terminal receives said medical examination chart from said medical center terminal and said delivery information from said pharmacy terminal.

14. (Original) The home medical examination method according to claim 9, wherein

said user terminal, said medical center terminal, said pharmacy terminal and said health insurance society terminal are connected through a communication network including the Internet, and

said health insurance society terminal receives  
said medical examination chart from said medical center terminal and said delivery information from said pharmacy terminal through said communication network.

15. (Original) The home medical examination method according to claim 13, wherein

said health insurance society terminal calculates  
costs of a medical examination and medical treatment conducted in response to said request for a medical examination of a disease based on said medical examination chart and said delivery information.
